Quick start: Annotator A (500 items, Excel)

You need **annotator_A.xlsx** and Excel. Full instructions: **instructions.pdf**. About 2 minutes per item; about 25 items a day works well.

0 First, within a day: check the 3 worked examples. Open the sheet **worked_examples**. For each row choose **OK** or **needs correction** (and write your correction in the last column). Save and send the file to Aarnav, then start the items.

Example: good corrected version	Why	Your check (OK / needs correction)	If it needs correction: your correction or comment
aadagyu, chaligaladalli avaru vibhinna reethiya saundarya mattu modi hondiddare, jothege aneka giridhamagalu arogyakara pramanada himavannu padeyuttave mattu himada mele prayana maduvanthaha mattu himada mele jaruvanthaha chatuvatikegalannu needuttave.	One word was left in Kannada script (ಪಡೆಯುತ್ತವೆ), "chaligatalli" is misspelt and "pramanavannu himavannu" does not read right. The meaning is all there, so meaning = yes, but nobody would type it like this: naturalness 2. The correction fixes only those words and keeps every Kannada word, in order.	OK	
aadre winter alli avakke bere thara beauty mattu charm ide, thumba hill stations alli olle snow beeltade, mattu skiing, snowboarding thara activities kooda irtave.	"hodhre" ("if they go") changes the meaning, "chadigaladalli" is misspelt, and "snow mele travel maadtha iruvanthe" is a clumsy way to say skiing. Meaning = no, naturalness 2. The correction uses the English words people really use on WhatsApp (winter, charm, skiing, snowboarding) and keeps the full meaning.		

1 Turn off AutoCorrect before typing. In Excel: File > Options > Proofing > AutoCorrect Options, and untick *Correct TWo INitial CApitals*, *Capitalize first letter of sentences* and *Replace text as you type*. On a phone or tablet, also turn off autocorrect and automatic capitals in your keyboard settings.

2 Open the file. On the sheet **READ_ME**, type your name in the yellow cell (the same name every time).

1.	What to do: first check the 3 examples in the sheet "worked_examples" (OK, or write your correction), save, and send this file to Aarnav within a day. Then, in the sheet "items", for each AI draft: rate it first (naturalness 1-5, keeps the meaning yes/no), then correct it in "your corrected version" (leave it as it is if it is fine).
2.	Save with File > Save as an Excel Workbook (.xlsx), never as CSV. Type your name in the yellow cell below. Send the .xlsx file to Aarnav on WhatsApp at the end of each week.
3.	Turn off AutoCorrect before typing: File > Options > Proofing > AutoCorrect Options, and untick "Correct TWo INitial CApitals", "Capitalize first letter of sentences" and "Replace text as you type".
4.	If you use the Excel app on a phone or tablet, also turn off autocorrect and automatic capitals in your keyboard settings.
5.	Type the way you really type: there is no single correct spelling. No translation tools, AI tools or dictionaries; do not discuss the items with anyone. Questions: ask Aarnav.
Your name:	Annotator A

3 In the sheet **items** (one row per item): **rate each draft first**, before changing anything: choose naturalness 1–5 and keeps-the-meaning yes/no from the dropdowns. **Then correct** the draft in *your corrected version* (it starts as a copy of the draft; leave it if it is fine). Do the same for the Kanglish draft.

1. Natural romanization: AI draft	Natural: naturalness of the draft (1 = nobody would type this, 5 = exactly how people type)	Natural: draft keeps the meaning (yes / no)	Natural: your corrected version (starts as the draft; leave it if it is fine)
aadagyu, chaligatalli avaru vibhinna reetiya saundarya mattu modi hondiddare, jotege aneka giridhamagalu arogyakara pramanavannu himavannu ಪಡೆಯುತ್ತವೆ mattu himada mele prayana maduvanthaha mattu himada mele jaruvanthaha chatuvatikegalannu niduttave.	2	yes	aadagyu, chaligaladalli avaru vibhinna reethiya saundarya mattu modi hondiddare, jothege aneka giridhamagalu arogyakara pramanada himavannu padeyuttave mattu himada mele prayana maduvanthaha mattu himada mele jaruvanthaha chatuvatikegalannu needuttave.

4 Save with Ctrl+S as an Excel Workbook (**.xlsx**), never as CSV. You can close and reopen the file any time: your work is in the file. **Send the .xlsx to Aarnav at the end of each week** (WhatsApp, as a Document).

Rules: type the way you really type; there is no single correct spelling. No translation tools, AI tools or dictionaries. Do not discuss items with anyone. Use the Note column for anything odd. Only the yellow cells can be changed. Questions or problems: ask Aarnav.
