Quick start: Annotator B, part 1 (40 items, Excel)

You need **annotator_B_part1.xlsx** and Excel. Full instructions: **instructions.pdf**. About 2 minutes per item.

1 **Turn off AutoCorrect before typing.** In Excel: File > Options > Proofing > AutoCorrect Options, and untick *Correct TWo INitial CApitals*, *Capitalize first letter of sentences* and *Replace text as you type*. On a phone or tablet, also turn off autocorrect and automatic capitals in your keyboard settings.

2 Open the file. On the sheet **READ_ME**, type your name in the yellow cell (the same name in both parts).

1.	What to do: for each Kannada sentence in the sheet "items", write it yourself in English letters, the way you type on a phone, word for word (natural romanization), and as Kanglish (how a young person in Bengaluru would write it on WhatsApp, keeping the full meaning). Do all 40. Nothing to rate.
2.	Save with File > Save as an Excel Workbook (.xlsx), never as CSV. Type your name in the yellow cell below. Send the .xlsx file to Aarnav on WhatsApp as soon as all 40 are done.
3.	Turn off AutoCorrect before typing: File > Options > Proofing > AutoCorrect Options, and untick "Correct TWo INitial CApitals", "Capitalize first letter of sentences" and "Replace text as you type".
4.	If you use the Excel app on a phone or tablet, also turn off autocorrect and automatic capitals in your keyboard settings.
5.	Type the way you really type: there is no single correct spelling. No translation tools, AI tools or dictionaries; do not discuss the items with anyone. Questions: ask Aarnav.
Your name:	Annotator B

3 In the sheet **items** you see only a Kannada sentence. In the yellow cells, **write both versions yourself**, from scratch: natural romanization (word for word, as you type on a phone) and Kanglish. Nothing to rate. Do all 40.

Item ID	Kannada	Natural romanization: your version (Kannada typed in English letters, word for word)	Kanglish: your version (as a young person in Bengaluru would write it on WhatsApp)	Note (optional)
flores-212	ಅಪಾರ್ಟ್‌ಮೆಂಟ್‌ನ ಒಳಗಡೆ ಯಾರೂ ಇರಲಿಲ್ಲ.	apartment olagade yaaru iralilla.	apartment olage yaru irlilla	

4 **Save** with Ctrl+S as an Excel Workbook (**.xlsx**), never as CSV. You can close and reopen the file any time: your work is in the file. **As soon as all 40 are done, send the .xlsx to Aarnav** (WhatsApp, as a Document). Part 2 follows after that.

Rules: type the way you really type; there is no single correct spelling. No translation tools, AI tools or dictionaries. Do not discuss items with anyone. Use the Note column for anything odd. Only the yellow cells can be changed. Questions or problems: ask Aarnav.
